

REQUEST FOR PROPOSAL (RFP)

Enterprise Cyber Defense & Threat Intelligence Platform

Next-generation SOC automation, XDR integration, and 24/7 managed detection

ISSUING ORGANIZATION & KEY DETAILS

Issuing Entity:	Meridian Global (meridian.net)
Primary Contact:	Marcus Vance, Chief Information Security Officer
Direct Inquiries:	marcus.vance@meridian.net
Publication Date:	October 2026
Estimated Contract Value:	\$5,200,000 USD
Procurement Protocol:	Competitive Sealed Proposal (Phase-Gate Evaluation)

NOTICE: The information contained in this Request for Proposal is confidential and proprietary to Meridian Global. By accepting this document, prospective vendors agree to hold all technical architectures, commercial terms, and proprietary data in strict confidence under non-disclosure provisions.

1. Executive Summary & Problem Statement

Meridian Global is an international financial communications clearinghouse. In response to heightened nation-state threat actor activity targeting financial institutions, Meridian is issuing this RFP to procure a comprehensive Cyber Defense & Threat Intelligence Platform.

We previously completed a \$350k SIEM review and now require complete platform execution to overhaul security operations, telemetry correlation, and incident remediation.

2. Scope of Requirements & Capabilities

- Real-Time Behavioral Threat Detection: ML-driven detection capable of processing 180,000 EPS (events per second) across endpoints, identity, and cloud logs.
- SIEM & SOAR Integration: Bi-directional ingestion and playbook execution with Splunk Enterprise Security and Palo Alto Cortex XSOAR.
- Autonomous Containment: Sub-30-second automated host isolation and API token revocation upon confirmed high-confidence credential compromise.
- Threat Intelligence: Ingestion of commercial and proprietary STIX/TAXII threat feeds with automated IOC correlation.

3. Non-Negotiable Compliance & Disqualification Factors

- Data Sovereignty: All log storage, indexing, and processing MUST reside strictly within EU and US boundaries. Offshore analysis is an immediate contractual disqualifier.
- Regulatory Frameworks: Full adherence to NYDFS Part 500, GDPR Article 32, and DORA (Digital Operational Resilience Act).
- Insurance: Vendor must demonstrate a current \$50M Cyber Liability and Errors & Omissions policy.

4. Submission Instructions

- Complete proposals must be submitted electronically to marcus.vance@meridian.net by December 1, 2026.
- Shortlisted vendors will participate in a 48-hour live red-team/blue-team sandbox evaluation.
