

REQUEST FOR PROPOSAL (RFP)

Next-Gen Autonomous Supply Chain & IoT Logistics Modernization

Real-time edge telemetry, warehouse AGV dispatching, and ERP modernization

ISSUING ORGANIZATION & KEY DETAILS

Issuing Entity:	Acme Corporation (acme.com)
Primary Contact:	David Miller, VP of Global Procurement
Direct Inquiries:	david.miller@acme.com
Publication Date:	October 2026
Estimated Contract Value:	\$6,200,000 USD
Procurement Protocol:	Competitive Sealed Proposal (Phase-Gate Evaluation)

NOTICE: The information contained in this Request for Proposal is confidential and proprietary to Acme Corporation. By accepting this document, prospective vendors agree to hold all technical architectures, commercial terms, and proprietary data in strict confidence under non-disclosure provisions.

1. Program Overview

Acme Corporation produces industrial heavy equipment across 28 manufacturing facilities worldwide. To eliminate supply bottlenecks and optimize working capital, Acme is commissioning a modern Autonomous Supply Chain Execution Platform.

The system must bridge edge sensors across factories, automated guided vehicles (AGVs) in distribution centers, and our centralized enterprise systems.

2. Functional & Architecture Requirements

- ERP Integration: Native bidirectional connector with SAP S/4HANA Cloud and legacy AS/400 inventory databases.
- Edge IoT Stream Processing: Ingest telemetry from 45,000 IoT sensors (MQTT/OPC-UA) with sub-second latency for conveyor diversion.
- Warehouse AGV Fleet Dispatch: Algorithmic route dispatch for 300+ automated warehouse robotics units.
- Demand Forecasting: AI predictive replenishment engine reducing inventory holding costs by 15%.

3. Critical Operational Constraints

- High Availability: 99.995% uptime during manufacturing operations (24/7/365).
- Offline Resilience: Factory floor edge nodes must continue autonomous production buffering for up to 72 hours during WAN disconnection.
- ISO 9001 and ISO 27001 certified delivery pipeline.

4. Evaluation & Submission

- Submit comprehensive responses by November 30, 2026 to david.miller@acme.com.
- Requires fixed-fee pricing for Phase 1 (Core Platform) and unit-rate pricing for factory rollouts.
