1. Executive Summary

FinTech Global Systems processes over \$40 Billion in annual transactional payments across 14 sovereign jurisdictions. We are embarking on our flagship core modernization to implement an ultra-low latency core transaction ledger with sub-5 millisecond AI fraud classification.

2. System Architecture Requirements

- Throughput & Latency: Sustained 35,000 TPS (transactions per second) with p99 response times strictly below 5ms.
- Streaming Pipeline: Distributed event streaming utilizing Apache Kafka and Flink with exactly-once processing guarantees.
- AI Fraud Scoring: Real-time neural scoring evaluating 200+ transactional and biometric signals prior to ledger commitment.
- Zero Data Loss: Synchronous multi-region replication with zero recovery point objective (RPO = 0).

3. Regulatory & Legal Mandates

- PCI-DSS v4.0 Level 1 compliance is mandatory prior to production certification.
- Federal Reserve FedLine and SWIFT ISO 20022 messaging compatibility.
- Immutable cryptographic audit log verifying all ledger state mutations.

4. Procurement Timeline

- Responses due: December 5, 2026 to priya.patel@fintechsystems.com.
- Contract Award: January 2027 for a multi-year phased rollout.
