

REQUEST FOR PROPOSAL (RFP)

Secure Satellite Telemetry Processing & FedRAMP High Cloud Hub

Mission-critical LEO satellite telemetry ingestion, ITAR compliance, and radiation-hardened edge computing

ISSUING ORGANIZATION & KEY DETAILS

Issuing Entity:	Titan Aerospace (titanaerospace.com)
Primary Contact:	Amanda Holloway, VP of Government Contracts
Direct Inquiries:	amanda.holloway@titanaerospace.com
Publication Date:	October 2026
Estimated Contract Value:	\$12,000,000 USD
Procurement Protocol:	Competitive Sealed Proposal (Phase-Gate Evaluation)

NOTICE: The information contained in this Request for Proposal is confidential and proprietary to Titan Aerospace. By accepting this document, prospective vendors agree to hold all technical architectures, commercial terms, and proprietary data in strict confidence under non-disclosure provisions.

1. Mission Overview

Titan Aerospace manufactures defense-grade low-earth orbit (LEO) satellite constellations. Under prime defense contracts, Titan is establishing a resilient, sovereign Ground Segment & Telemetry Cloud Processing Hub.

The selected vendor will architect the ingestion pipeline, data lakehouse, and automated anomaly detection platform for satellite downlink telemetry.

2. Rigorous Security & Sovereign Mandates

- Strict FedRAMP High Authorization and DoD Impact Level 5 (IL5) compliance.
- International Traffic in Arms Regulations (ITAR) adherence: All supporting personnel MUST be verified US citizens on US soil.
- Post-Quantum Cryptography: Implementation of NIST-approved quantum-resistant encryption algorithms for satellite ground station uplinks.

3. Engineering & Ingestion Performance

- Sustained 50 Gbps downlink stream processing during orbital flyovers.
- Real-time orbital mechanics modeling and collision avoidance calculation with NORAD space catalog data.
- Zero data drop SLA: Redundant multi-region satellite ground station ingest.

4. Submission Instructions

- Submit cleared technical proposals by December 20, 2026 to amanda.holloway@titanaerospace.com.
- Facility security clearance (FCL) verification required prior to receiving annex technical appendices.
