

REQUEST FOR PROPOSAL (RFP)

Global Cloud Migration & Infrastructure Modernization

Enterprise multi-cloud architecture transition across AWS and Azure

ISSUING ORGANIZATION & KEY DETAILS

Issuing Entity:	Vertex Cloud Solutions (vertex.com)
Primary Contact:	Sarah Chen, Chief Technology Officer
Direct Inquiries:	sarah.chen@vertex.com
Publication Date:	October 2026
Estimated Contract Value:	\$4,500,000 USD
Procurement Protocol:	Competitive Sealed Proposal (Phase-Gate Evaluation)

NOTICE: The information contained in this Request for Proposal is confidential and proprietary to Vertex Cloud Solutions. By accepting this document, prospective vendors agree to hold all technical architectures, commercial terms, and proprietary data in strict confidence under non-disclosure provisions.

1. Executive Summary & Objective

Vertex Cloud Solutions operates high-traffic software platforms serving over 12 million active users globally. Over the past five years, rapid scaling resulted in fragmented on-premises data centers across North America and Europe.

The objective of this RFP is to select a premier systems integrator to orchestrate the migration of 80% of legacy core workloads into a secure, multi-cloud environment (AWS & Microsoft Azure) within an 18-month phased schedule.

2. Core Technical & Architecture Scope

- Multi-Cloud Networking: Design an automated hub-and-spoke transit network with low-latency interconnects between AWS US-East and Azure East-US regions.
- Zero-Downtime Database Migration: Migrate 500+ TB of PostgreSQL and distributed Cassandra clusters with strict downtime limitations under 15 minutes per shard.
- Containerization: Standardize over 120 internal microservices onto managed Kubernetes (EKS and AKS) with GitOps automation via ArgoCD.
- Disaster Recovery: Active-active cross-region failover achieving RPO < 10 seconds and RTO < 5 minutes.

3. Security, Governance & Compliance Mandates

- Mandatory SOC 2 Type II and ISO 27001 continuous compliance monitoring.
- Implementation of zero-trust network access (ZTNA) with mTLS between all service communication channels.
- Encryption at rest using customer-managed KMS keys with FIPS 140-2 Level 3 HSM backing.

4. Vendor Eligibility & Evaluation Criteria

- Minimum 5 years of certified tier-1 cloud consulting with demonstrable migrations over 10,000 workloads.
- Mandatory AWS Premier Tier Services Partner and Microsoft Solutions Partner designations.
- Proposals must provide dedicated senior cloud architects on-site during cutover weekends.

5. Commercial Structure & Submission Timeline

- Proposals due: November 15, 2026 at 17:00 EST to sarah.chen@vertex.com.
- Contract Model: Hybrid Milestone-based Fixed Price with SLA performance incentives.
